Contract Task Order No. 0842

Subject: Technical Memorandum – Records Review and Field Sampling Plan
Coddington Cove Rubble Fill Area, SA-04
Naval Station Newport, Newport Rhode Island

Dear Mr. Frye:

Enclosed for your information, you will find four copies of the Technical Memorandum for the site referenced above. The sampling effort described within this document is intended to be an accelerated "first look" at this site, being conducted to prioritize work at NAVSTA sites.

As noted by the distribution list below, this document has been provided to the IR Program group for their information as well. Although it is provided as a "Draft", we do not anticipate a technical review or comments at this time, as discussed at the RPMs meeting on January 21, 2004.

Please be advised that we have scheduled field investigations at the site for the week of May 17-21, 2004. If you have any questions regarding this material, please do not hesitate to contact myself or Deb Chisholm, here in this office.

Very truly yours,

Stephen S. Parker, LSP
Project Manager

SSP/rp
